Self Lubricating Metal Repair System

Belzona® 1131 (Bearing Metal) is a two-component paste grade repair system with self lubricating properties for creating low friction surfaces subject to intermittent contact and low specific loads.

Belzona® 1131 (Bearing Metal) will:

- Simplify maintenance procedures
- Reduce the need for spare parts
- Cut downtime
- Improve safety by reducing hot work

This fully machinable product can be applied without the need for special tools and bonds to virtually any surface including steel, aluminium, copper, fiberglass laminate, stainless steel, glass, concrete, and brass.

Belzona® 1131 (Bearing Metal) has a unique microporous structure to trap and hold lubricating oil, minimizing friction at start-up.

Belzona® 1131

Bearing Metal

Bushings

Bearings

Low Friction Surfaces

Pipe Supports

Applications for Belzona® 1131 (Bearing Metal) include:

- Shafts
- Bearings
- Bushings
- Guides
- Slideways
- Pipe supports
- Low friction surfaces

Belzona provides the solution to your repair and maintenance needs.

BELZONA®
Repair • Protect • Improve

Belzona® 1131 (Bearing Metal) is:

Belzona® 1131

Bearing Metal

Simple

- No specialist tools required
- Easily mixed and applied

Safe

- Cold temperature cure ensures no fire risk
- Excellent electrical insulating properties

Versatile

- No expansion, contraction, or distortion during cure
- Apply thick or thin sections in one operation
- Stays in place when applied to overhead or vertical surfaces
- Molds to precise contours
- Fully machinable with conventional tools
- Bonds strongly to almost any surface

Effective

- The porous oil-holding surface of the product minimizes wear at start-up and reduces risk of seizure in the event of lubrication starvation.
- High mechanical strength
- Excellent heat resistance
- Outstanding resistance to a wide range of chemicals

Shafts
